ALBERT PARK STREET CIRCUIT

The Albert Park Street Circuit is 5,303 meters long and is located on public roads, located in Albert Park. The track is mostly flat and features sixteen corners, some of which are very fast. The track was often heavily criticized – overtaking was far from common on the relatively narrow street circuit. Where the track was wider, the braking zones were bumpy. Therefore, in recent years many changes have been made to the circuit.

Among other things, the pit lane has been widened. This way, drivers can drive through the pits faster. This should make pit stops more attractive and create more interesting strategies. Furthermore, the track has been resurfaced and seven corners have been modified. The goal was more overtaking opportunities and higher speed.
